SUMMARY

Senior software engineer with **8+ years** building reliable, high-scale web platforms. I turn ambiguous product goals into shipped features, mentor engineers, and care deeply about developer experience and clean, well-tested systems.

EXPERIENCE

Senior Software Engineer Mar 2021 – Present
Vertex Labs | San Francisco, CA

- Led the rebuild of the billing platform serving **2.4M** customers, cutting payment failures by **38%** and reclaiming \$4.1M in annual revenue.
- Architected an event-driven services layer (Kafka + TypeScript) that reduced p95 checkout latency from 820ms to **190ms**.
- Mentored 6 engineers; introduced a code-review playbook that lifted PR throughput 27% without raising defect rate.

Software Engineer Jun 2018 – Feb 2021
Northwind Software | Austin, TX

- Built the company's first design-system component library (React + Storybook), adopted by 9 product teams.
- Shipped a real-time analytics dashboard handling **40k events/sec** with sub-second refresh.
- Reduced CI pipeline time 64% by parallelizing test suites and adding intelligent caching.

PROJECTS

Pulse – Open-source observability 2022 – Present
github.com/alexmorgan/pulse

A lightweight metrics + tracing toolkit for small teams.

- 3.2k GitHub stars, 40+ contributors.
- Zero-config OpenTelemetry instrumentation for Node and Go.
