SUMMARY

Senior Flutter Developer with 5+ years of experience designing, developing, and deploying high-performance cross-platform mobile applications using Flutter and Dart. Skilled in GetX, Provider, BLoC, MVC and clean architecture, REST API integration, Firebase, real-time communication, and secure authentication. Experienced in building scalable applications, optimizing rendering performance, implementing payment gateways, and integrating AI-powered features. Strong focus on reusable components, maintainable code, responsive UI, and delivering reliable products aligned with business requirements.

EXPERIENCE

Senior Flutter Developer
Mar 2022 — Present

TechNova Solutions
Coimbatore, Tamil Nadu

- Developed and maintained 6+ cross-platform mobile application modules using Flutter, Dart, and reusable architectural components.
- Improved application startup and screen rendering performance through lazy loading, widget optimization, and efficient state management.
- Integrated REST APIs, Firebase Cloud Messaging, push notifications, analytics, secure authentication, and third-party payment services.

PROJECTS

SmartCart E-Commerce Mobile Application
4 Months —

https://example.com/projects/smartcart

Designed and developed a feature-rich e-commerce mobile application supporting product discovery, category-based browsing, advanced search and filtering, wishlists, shopping carts, secure checkout, and real-time order tracking. Integrated REST APIs for product catalog and order management, implemented Firebase authentication and push notifications, and connected a payment gateway for secure transactions. Built reusable responsive widgets, implemented pagination and image caching, and optimized application state management for a smooth user experience across Android and iOS.

Flutter | Dart | GetX | REST API | Firebase | Razorpay | MVC Architecture

Workforce and Field Operations Management System
5 Months —

https://example.com/projects/workforce-management

Developed a workforce management application for employee onboarding, contractor management, attendance tracking, subscription handling, payment processing, and task assignments. Integrated REST APIs for employee and operational data, implemented role-based access and push notifications, and incorporated location-based features using mapping services. Created reusable dashboard components, form validation, structured error handling, and optimized API request flows to improve reliability and usability for field teams and administrators.

Flutter | Dart | GetX | REST API | Firebase Cloud Messaging | Google Maps API | MVC Architecture

EDUCATION

Bachelor of Technology in Information Technology
2016 — 2020

Coimbatore Institute of Technology
Coimbatore, Tamil Nadu · 8.75 GPA

Specialized in mobile application development,software engineering,database management,data structures,and object-oriented programming.
