SUMMARY

Senior software engineer with 8+ years building reliable, high-scale web platforms. I turn ambiguous product goals into shipped features, mentor engineers, and care deeply about developer experience and clean, well-tested systems.

EXPERIENCE

Senior Software Engineer Vertex Labs San Francisco, CA Mar 2021 — Present

Led the rebuild of the billing platform serving 2.4M customers, cutting payment failures by 38% and reclaiming \$4.1M in annual revenue.

- Architected an event-driven services layer (Kafka + TypeScript) that reduced p95 checkout latency from 820ms to 190ms.
- Mentored 6 engineers; introduced a code-review playbook that lifted PR throughput 27% without raising defect rate.

Software Engineer Northwind Software Austin, TX Jun 2018 — Feb 2021

Built the company's first design-system component library (React + Storybook), adopted by 9 product teams.

- Shipped a real-time analytics dashboard handling 40k events/sec with sub-second refresh.
- Reduced CI pipeline time 64% by parallelizing test suites and adding intelligent caching.

EDUCATION

B.S., Computer Science University of California, Berkeley Berkeley, CA Aug 2012 — May 2016

Grade / GPA: 3.8 GPA

Distributed Systems · Machine Learning · Databases · Algorithms

PROJECTS

Pulse — Open-source observability github.com/alexmorgan/pulse 2022 — Present

A lightweight metrics + tracing toolkit for small teams. 3.2k GitHub stars, 40+ contributors.
